CovaTEX TAMA

CovaTEX Tama is a mixture of wheat and maize. The feed value of this mixture is optimised by a special multi-thermal treatment to improve the digestibility of the nutritional substances and characteristics.

We use the latest and most advanced technology for both the food and feed industries to precook raw materials. The cell structure is processed intensively because of a combination of temperature, friction and pressure within this context, and, therefore, the starch is rendered soluble to the highest degree. This results in better digestibility. The process is performed with a relatively high water content, which boosts the cooking process. The absorption capacity is also, moreover, considerably increased.

Nutritional values

Dry matter	870 g/kg	Phosphorus	3.0 g/kg		
Crude protein	105 g/kg	Sodium	0.2 g/kg	Dv. LYS (Swine)	2.4 g/kg
Crude fat	29 g/kg	Potassium	3.7 g/kg	Dv. MET (Swine)	1.7 g/kg
Crude fiber	24 g/kg	Chloride	0.2 g/kg	Dv. MET + CYS (Swine)	3.6 g/kg
Crude ashes	17 g/kg			Dv. THR (Swine)	3.0 g/kg
Starch	601 g/kg	Lysine	2.9 g/kg	Dv. TRP (Swine)	0.8 g/kg
Sugar	25 g/kg	Methionine	1.9 g/kg		
NSP	93 g/kg	Meth. + Cystine	4.2 g/kg	Version	V102-01
ME Pig	13.88 MJ/kg	Threonine	3.5 g/kg	Date	05/10/2012
		Tryptofane	0.9 g/kg		
Calcium	0.5 g/kg				

The above items are average values. All values are calculated per kg of product.

Composition

wheat and maize

Feed advice

Suckers (up to 11 kg): 20 - 40% of the feed ration

Rearing piglets (up to 25 kg): 5 - 20% of the feed ration

Shelf life

several months when stored dry

Benefits

- A maximum preprocessing of starch
- A tasty product
- A very high water-absorbing capacity
